

ccHDtv DTV USB Dongle

When installing ccHDtv system, for the industry can have a very convenient and reliable tool, so developed this USB installation tool. Through PDHVCR02, You can know the signal quality of the camera, and adjust the image, such as: sharpness, saturation, contrast and brightness, and even modify the camera channels to meet the installation requirements.

Camera signal quality, Through this tool can also, detection coaxial cable, How many cameras, Each signal strength, attenuation and other information, Determine whether the need to adjust the installation distance, or wires and connectors properly.

Feature

- Frequency: VHF - III (170MHz~240MHz), UHF (470MHz~862MHz)
- 6 / 7 / 8 MHz, automatically selected.
- Support USB 2.0.
- RF module signal quality, strength, and data analysis.
- Through RS-32 support full two-way communication Duplex Communication.
- Follows the DVB-T specification ETSI 300 744 (DVB-T).
- Easy to install, and through Windows application, you can check the DTV signal, setting and upgrades.

Specifications

Power Input	USB Bus Power 5V/0.5A
Signal Input	USB : USB 2.0 A-Type
Signal Output	DTV : 1 x CVBS BNC
LED	Green is ch. locked
Ttwo-way communication	RS-232
DTV VHF-III frequency	170MHz~240MHz
DTV UHF frequency	470MHz~862MHz
Bandwidth	6 / 7 / 8 MHz
